

The DeXpro Delux Digital unvented water heaters are ideal for use in light commercial applications such as, offices, shops, factories, schools/universities, hospitals, modular buildings or domestic applications often when there is no gas supply.

The DeXpro Delux Digital unvented will deliver mains pressure hot water to 1 or multiple outlets. See our size guide for assistance on selecting the correct size for your needs.

Built to last, quality assured The steel tank and connection pipes have a blue diamond enamel coating that is rust proof and corrosion resistant.

Economically friendly The tank has extremely dense CFC-FREE insulation that if the power is turned off to the appliance the water temperature will be maintained up to 48hrs.

- 6, 10 & 15 Litre storage capacity
- Digital temperature display
- 2.0kW Element for rapid heat up
- High Grade SS316 Stainless Steel Heating Element
- Blue diamond enamel coating on inner steel tank and inlet/outlet
- High density insulation CFC FREE polyurethane
- Anti-corrosion and energy saving protection
- External temperature control
- Magnesium anode protection
- Empty heat up and overheat protection
- Manually re-settable thermal cut out
- Floor standing or wall mounted
- Mains pressure (unvented) unit
Max. working pressure 6 bar
- Max. working temperature 75°C
- Brass safety pressure relief valve supplied

KEY FEATURES

ERP Energy rating: **A**

The accessory kit DXUKIT1 may be required depending on where the appliance is installed. The supplied 6 bar pressure relief valve must be installed and plumbed to the nearest external drain. Refer to the unvented diagrams on page 10.
